

Feature	Brand/Model #			Definition
	JBS/Alert	Bulldog		
	300E	KEY 150	1702	
Three-button Remote		-	-	
Four button Remote	Yes	Yes	Yes	
Remote Transmitters Included	2	1	2	
On-board Relay for the Door Locks	Yes	Yes	Yes	Provides a positive or negative output for the door lock market using type A,B or C door lock circuits.
Remote Learning	Yes	Yes	Yes	You can easily program additional transmitters.
Number of Remotes Programmable	4	4	4	
Parking Light Output (R=Onboard Relay)	(-)	(-)	(-)	The output is a transistorized output that requires a resistor.
Additional (-) 250ma Outputs	No	No	No	Additional outputs would be for items like opening a sunroof or opening a sunroof by remote.
Programmable Chirps On/Off	No	No	No	When performing a function on the remote such as locking the horn would provide a chirp confirmation that this function was successful.
Factory Security Re-arm Signal	No	No	No	When unlocking the doors the unit will disable the alarm. When locking the doors you will hear the alarm.
Panic		-	-	Provides a constant horn or siren output when the panic button is pressed for a certain time duration.
Advertised Range	250'	250'	250'	
Remote Car Finder	No	No	No	This will allow a user to locate a vehicle by activating the horn rapidly for 6 to 10 times.
Horn Output	No	No	No	Provides a transistorized output to activate a horn.
Trunk Output	Yes	Yes	Yes	Provides a transistorized output to activate a trunk.
Starter Disable	Yes	Yes	Yes	This will provide a transistorized output when locked to activate a starter interrupt relay.
Dome Light Supervision	No	No	No	Provides a transistorized timed output when unlocked to illuminate the interior lights of the vehicle.
Aux. Output for Factory Disarm	Yes	Yes	Yes	This will provide a transistorized output to deactivate the door or opening the trunk.
Ignition Controlled Auto Locking On/Off N	No	No	No	This feature will automatically lock the doors when the vehicle is shut off.
